

OKAY RETARDER

Drying Time Retarder

DESCRIPTION :

Okay Retarder is a special additive for emulsion water based coatings. It prolongs coating drying time if the ambient temperature is higher and/or humidity is too low. It gives more time for accomplishment of special pressed patterns before complete drying of the coat. It reduces the risk of the paint drying too quickly, which may lead to such faults as "orange skin" or roller marks.

APPLICATION DATA:

Add 4% Max. of **Okay Retarder** (up to 200 cm³ for 5L)

Note: compatible with emulsion coatings only

SHELF LIFE AND STORAGE

12 months from production date if stored in its original tightly closed container in a dry place away from direct sunlight and excessive heat.

Disclaimer: The information & data contained herein are given in good faith but without warranty. We recommend that before using our products, the customer should make his/her own tests to determine the suitability of the products for his/her own purpose under his/her operating conditions. As the circumstances under which our products are stored, handled and used are beyond our control, we cannot assume any responsibility for their use by the customers.
